

Jeffrey Gordon

Dr. Jeffrey Gordon is the Dr. Robert J. Glaser Distinguished University Professor at Washington University School of Medicine in St. Louis. He received his A.B. from Oberlin College and his M.D. from the University of Chicago. He joined the Washington University faculty after completing clinical training in internal medicine and gastroenterology, and spending three years as a research associate at the NIH. He was Head of the Department of Molecular Biology and Pharmacology from 1991-2004 before becoming Director of a new interdepartmental Center for Genome Sciences and Systems Biology. From 1994 to 2003, he also served as director of the University's Division of Biology and Biomedical Sciences, which oversees all PhD and M.D./PhD students in the biological sciences.

Dr. Gordon and his students conduct interdisciplinary studies of the genomic and metabolic foundations of mutually beneficial host-microbial relationships in the human gut. A central focus of his group is the relationship between our gut microbiomes and nutritional status. He is a member of the National Academy of Sciences, the American Academy of Arts and Sciences, and the Institute of Medicine of the National Academies.
